

Tuesday, December 2 ♦ 13:00 – 15:00 ♦ European Pavilion

The need and challenge of ambitious climate-energy strategies at the urban scale

The involvement of local communities in tackling climate change and promoting sustainability is increasingly recognized as central and readily visible through various initiatives around the globe. How are they shaped to deliver their long term ambition? This side event will discuss the design of climate friendly strategies for cities. Concrete initiatives will be introduced by speakers from MINES ParisTech (research), the French region PACA (local authority), and Schneider Electric (industry).

LIMA COP20 / CMP 10
UN CLIMATE CHANGE CONFERENCE 2014

Chair Modeling for sustainable development

Welcome addresses

Nadia MAÏZI, Professor and Director of the Centre for Applied Mathematics, MINES ParisTech, co-responsible of the Chair Modeling for sustainable development

Edi ASSOUMOU, Research Fellow at the Centre for Applied Mathematics, MINES ParisTech

Annick DELHAYE, Vice President of the Region Provence Alpes Côtes d'Azur

Vincent MAZAURIC, Principal Scientist, SCHNEIDER ELECTRIC
